

We proud to announce that Canada Metal (Pacific) Ltd. has been presented a North American Die Casting Association (NADCA) Outstanding Safety Award, based on its 2015 safety record. This award recognizes our company's outstanding safety record during the previous year, as documented by the statistics submitted to NADCA on the safety award application form. NADCA's Safety award only recognizes NADCA Corporate Members that have maintained a safety record equal to or less than 4.0, the national average for ALL manufacturing.

Award winning companies will be featured in the May issue of [DCE](#) magazine. Winning companies will also be recognized during a luncheon at NADCA's [Die Casting Congress & Tabletop](#) in Columbus, Ohio, September 26-28, 2016.

Our team is proud of the exemplary safety record we have achieved and look forward to continuing this record in the upcoming year.
